Count of Records by Customer_sentiment

Sum of Tickets_last_30_days by Company_name

Average of Resolution Days by Priority

Customer Health is built on the unified (joined) dataset: each row links CRM deals with marketing leads and support tickets per account (63,420 rows). Rankings, averages and composition are the reliable reads; the KPI sums linked-record ticket volume. 59 tickets are unresolved; avg resolution 2.5 days.

59 tickets are unresolved and ACCT-041 alone carries 334 tickets on \$40,722 of revenue. Assign a dedicated CSM to the top ticket-heavy accounts this quarter to cut churn risk.
